Social Media and Equine Science: The Effect of LinkedIn on Class Engagement of Equine Science Higher Education Students
Social Media

“We don’t have a choice on whether we DO social media, the question is how well we DO it.”

– Erik Qualman

Erik Qualman- Socialnomics
Online Teaching Tools in Equine Science

Michigan State University

Kentucky Equine Research
Research Question

• Does the use of LinkedIn as a teaching tool have an effect on student engagement in the equine science classroom?
Methods

• 2 separate equine science classes selected in Fall and Spring Semesters (data was combined)
  – LINK group (N=26)
  – TRAD group (N=17)
• Classes taught by same teacher, same amount of time per week, and same level of coursework difficulty
• LINK required class participation on LinkedIn
  – Questions about peer-reviewed articles
  – LinkedIn group activity summaries
• Pre-, mid-, and post-course surveys administered
• Approved by IRB as a Level 1 project
Nice article on metabolism.

Linked In Part 4

Elise Lofgren
Graduate Teaching Assistant at Murray State University

Hey everyone, I have attached links to two articles related to biomechanics and lameness. Please come up with one question per article and post on the discussion page. Your participation in creating questions on our page will be due by this Friday, November 1st.

Article 2: http://www.thehorse.com/articles/15546/biomechanical-efficiency

Dr. Porr also has the book "The Dynamic Horse" in her office if anyone is interested in taking a look at it. Have a great week!

Biomechanics and Hoof Problems, Treatment (AAEP 2012) thehorse.com
One vet encouraged practitioners and farriers to take a biomechanical approach to treating some foot problems.
Results

- 77% of students surveyed had previous experience with social media used in another class. The majority of students felt that:
  - Social media had some impact as a tool in equine science and higher education
  - A greater connection was achieved between teacher and student
  - Traditional lecture and PowerPoint presentations in class were the most effective for learning
Table 1: Likert Responses for LINK Students and Post-Course Survey Questions, N=26

</table>
• “It is a great way to get involved in the outside world other than the classroom setting and get an outside point-of-view on topics.”
• “It gives students a chance to actually visualize what they are learning and see other opinions from individuals all over the world.”
• “Involve more of the class work with LinkedIn, discuss what was said in class on the forum, and relate it back to everyday use to better increase everyone’s understanding.”
Conclusion

• What this study tells us

• What this study doesn’t tell us
