Common Core Kids go to College

by

Jennifer Jones, Hello Literacy
David W.W. Jones, North Carolina State University
How does it look and sound different?
COMMON CORE KIDS
will come to college having…

- Discussed more
- Disagreed more
- Collaborated more
- Created more
- Evaluated more
- Researched more
- Presented more
- Debated more
- Problem-solved more
- Inferred more
- Talked more
Common Core Kids will come to college proficient in 21st Century Skills:

- Communication
- Collaboration
- Creativity
- Critical Thinking
...and **Common Core Kids** will be frustrated if college professors don’t allow them to use these learned skills.
COMMON CORE KIDS will come to college expecting to talk more than the teacher and create their own learning communities.
COMMON CORE KIDS will come to college expecting problems to solve, hands-on learning, and teacher as facilitator.
COMMON CORE KIDS
will come to college expecting to research their own knowledge, not have knowledge imparted on them.
COMMON CORE KIDS will come to college expecting to bring their own device and use it in class FOR learning.

BYOD: Learning in 21st Century
COMMON CORE KIDS will come to college more social media savvy and **USE** social media for communicating and collaborating with peers.
COMMON CORE KIDS will come to college more independent & proficient in informational text and be prepared to evaluate the author’s claims.
COMMON CORE KIDS will come to college more aware and fluent in global and social issues, have opinions about them, and with reasons & justifications.
COMMON CORE KIDS will come to college more developed critical thinking skills and be prepared to practice them verbally among peers in class.
"Great teachers engineer learning experiences that put students in the driver's seat and then get out of the way."

- Ben Johnson, Educator
